MEZO BUILDATHON · WAVE 2

Bulwark

Your Bitcoin loan on Mezo, rescued on-chain before liquidation

CIPOKLEAN.EU.CC/BULWARK

One bad night can cost a borrower their BTC.

MUSD loans below 110% collateral get liquidated. Most borrowers find out after it happens.

The market

29.5M

MUSD in circulation

13.1M

Dollars lent against 826 BTC

Today versus Bulwark

Today

Watch the chart. Wake up to an alert. Top up by hand and hope you were fast enough.

With Bulwark

Set one rule. Keep a small MUSD reserve in the vault. Any keeper rescues the loan in seconds.

How it works

OPEN

Open a MUSD loan through your own Bulwark vault and keep part as a reserve

SET

Pick a trigger and a target, for example rescue at 160% back to 175%

RESCUE

Any keeper calls rescue. The contract checks the live price and repays only what's needed

REWARD

The keeper earns 0.5% of the amount repaid, capped at 2%

Proof on testnet

3

Live rescues

185%

First rescue, up from 170.5%

2 of 2

Contracts verified

02

How Bulwark earns

Revenue grows with protected debt, not with liquidations.

Revenue model

STREAM	HOW IT WORKS	RATE
Rescue fee share	Cut of every keeper fee	20% of 0.5%
Reserve yield	Idle reserve earns in the Stability Pool	10% of yield
Copilot Pro	AI Telegram alerts and advice	Monthly plan
Integrations	Wallets and frontends embed rescue	Rev share

Unit economics

$1

Bulwark’s cut of a $1,000 rescue

$7.50

Yearly cut of a $1,500 reserve at 5%

$1.3M

Protected if 10% of loans join

03

Where it goes next

Open keepers, productive reserves, then mainnet.

Why Bulwark wins

No trust

The contract checks price and health itself. A keeper cannot over-repay or steal.

Open keepers

Anyone can run a keeper and earn fees, so there's no single bot to fail.

Owner in control

Withdraw, add BTC, borrow more, or close the loan at any time.

Roadmap

Wave 1 · Done

Contracts, keeper bot, Telegram alerts, dashboard, three live rescues

Wave 2 · November

Reserve yield, redemption awareness, open keepers, owner buttons, AI copilot

Wave 3

Security review, fuzzing, mainnet launch, keeper leaderboard

Protect every MUSD loan

Try the dashboard, run a keeper, and back Bulwark to mainnet.
